- Dog bins
- Bins & recycling
- Steep incline

All vehicles **MUST** stay on the designated routes, with signs like this one. Please do not attempt **Healey's Hill**.

**NO ENTRY** signs look like this one

## Accessibility

Welcome to Trebah. This sheet does not contain personal opinions as to our suitability for your access needs but aims to accurately describe the garden to you so you can judge from our advice whether your vehicle is suitable.

The garden is located in a ravine that drops to the beach. For those who intend to bring their own wheelchair or motorised vehicle please consider if it is suitable for steep hill use and able to operate on uneven surfaces.

- Your vehicle needs an approximate clearance of at least 125 mm or 5 inches to get over the gravel bumps
- You will need a fully charged battery
- All paths are compacted gravel with loose chippings, and some have new resin paths. Some areas are steep
- All vehicles MUST stay on the designated routes given to you by our entrance staff
- Please note – DO NOT drive on the shingle or sand whilst accessing the beach area. Please keep to the large concrete standing
- The accessible route is NOT on the Children's Trail routes
- Footpaths vary in width, but most are about 1 m (3 feet) wide
- There are many benches throughout the garden
- Please be aware when travelling up hills weight will transfer to the back of the vehicle so please avoid heavy items being stored on the back i.e. bags

This is our recommendation because of high clearance and big wheels

Not recommended due to its low ground clearance and small wheel and possible lack of power for the hills

By entering the garden today, you acknowledge that you understand the advice given and that you have been made aware of the suitability of your vehicle for our terrain.
